

20' CONTAINER

20' containers come in a variety of colors; tan, blue, grey. For delivery of a 20' rental container you will need approximately 75 feet of straight clearance. We ground deliver the cargo container to your site on a tilt-bed trailer. Our storage containers are equipped with a "Lock Box" or a new "Interior Locking System" designed to conceal and protect your padlock. (Please see "Locking Options") Units are constructed with heavy-duty 14 gauge steel panels. Rentals are half the price of a mini storage with the added benefit of onsite and offsite relocation. (Please see "Loaded Respts") We also have available 20' containers with doors on both ends and refrigerated units.
