

CONTAINER LOCK OPTIONS

Standard Lock Box System

New Interior Recessed Locking System

Description

Pad lock fits inside the box providing extra security from theft, by making it inaccessible to bolt cutters

The box sits flush to the lock rods, thereby keeping it small enough to stay within ISO dimensions

Description

Puck lock fits flush inside recess making it impossible to be cut or tampered with

The locking mechanism utilizes interior lock rods thereby allowing for the removal of the outer lock rods

Ideal for personal storage application

Available in 20' and 40' Sizes
